FLEET MANAGEMENT

DOUBLE CLICK FLEET MANAGEMENT SOLUTION FOR BUSINESS ONE

- Route Management
- Documents & Filing Management
- Vehicle & Transport Management
- GPS Integration
- Driver Management
- Fuel Management
- Insurance Management

- Maintenance Management
- Tyre Management
- Reports

Overview

The questions which an organization having substantial fleet size is asking

- How can we control and reduce our vehicle costs?
- How to track the profitability and turnaround of each fleet at any point of time?
- What is our total cost of ownership of each trip/vehicle?
- How can we centrally manage fleet which are spread across several countries? How to check vehicle movement position every day and control there waiting time at each location?
- How do we ensure best in class service to our customers?
- How to control vehicle maintenance and inventory items?
- How can we identify leasing companies to provide us maintenance service and fuel to reduce costs?

Route Management

Improve Driver Safety while Controlling Costs

Instruct your drivers to stay safe and prompt increase of any deviation from the defined standards in real time. Better driving could save you money with few service appointments.

Effective Asset Utilization

Monitoring the locations and status of vehicles also provides important insight as to the readiness of vehicle to be reloaded or sent to another job.

Aleerting

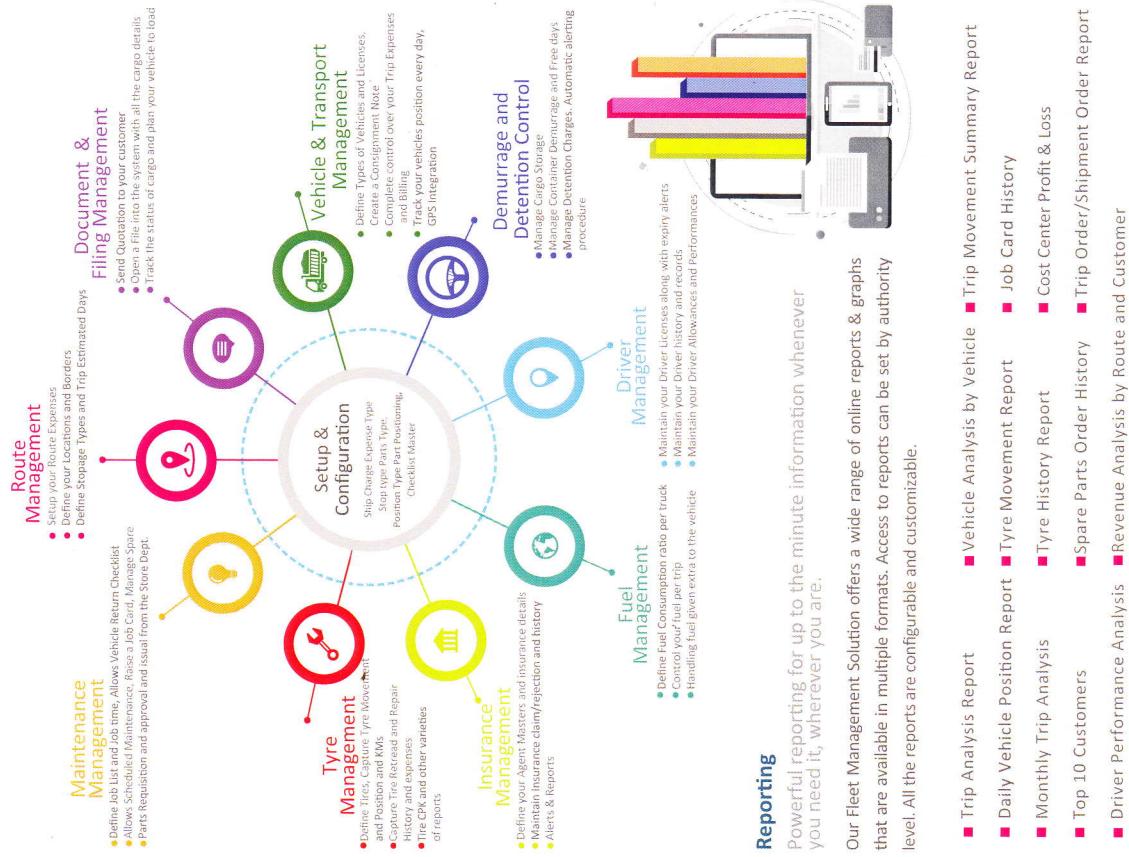

Real time with configurable rules-based alerts sent to your Screen, email or phone.

Service Management

Plan, Schedule and record vehicle maintenance costs and history

FLEET MANAGEMENT
